

Credit Card Performance Weekly Report

A strategic dashboard walkthrough exploring top-line transaction metrics, customer segmentation parameters, and robust data warehouse design.

By- HARSH TRIPATHI

Data Architecture

| DAX Model Schema Analysis

Database Modeling

The semantic layer designed inside the **dax model view.jpg** establishes a clean, unified relationship pattern to enable instant dashboard slicing:

-  **1-to-Many Relationship:** Configured between customer details and transactional tables.
-  **Primary Join Column:** Connected seamlessly via the unique key identifier Client_Num.
-  **Quarterly Slicing:** Sliced by Qtr and Week_Start_Date for point-in-time metrics.

Model Fields mapped

customer_detail (Dimension): Holds demographical fields such as Income, IncomeGroup, Education_Level, Gender, Personal_Loan, and State.

credit_card_detail (Fact): Contains transactional and operational indicators like Credit_Limit, Exp_Type, Interest_Earned, and calculated Revenue.

Transaction Report

| Top-Line YTD Transaction KPIs

Key indicators summarized across the entire portfolio as shown in **credit card transaction report.jpg** and the **Credit Card Transaction Report.pdf**:

\$55M

TOTAL REVENUE

\$7.8M

TOTAL INTEREST

656K

TRANSACTION COUNT

\$45M

TRANSACTION AMOUNT

YTD Revenue by Expenditure Type

Essential expenditures like Bills (\$14M) and Entertainment (\$10M) drive the bulk of high-margin card transactions.

Performance by Card Category

Card Category	Sum of Revenue (\$)	Sum of Total Trans Amt (\$)	Sum of Interest Earned (\$)
Blue (Core Engine)	\$46,139,398	\$36,957,875	\$6,495,887.7
Silver	\$5,586,332	\$4,586,746	\$812,081.3
Gold	\$2,454,072	\$2,024,078	\$373,784.2
Platinum	\$1,135,608	\$953,314	\$161,629.1
Portfolio Total	\$55,315,410	\$44,522,013	\$7,843,382.2

Customer Demographics

Education & Income Segment Drivers

Revenue by Education

Educational attainment correlates strongly with total portfolio performance metrics:

Occupations & Income Groups

Key demographics contributing to the \$55M overall customer revenue:

-  **Businessmen:** Represent a high value segment driving \$17M in revenue.
-  **White-Collar:** Reliable customer segment driving \$10M.
-  **Govt Employees:** Responsible for \$8M.
-  **High-Income Tier:** Generates \$22M within overall segment.

Top Revenue-Generating US States

According to the geographical mapping inside the **credit card customer report.jpg**, state economic dynamics significantly affect transactional margins:

State Territory	Male Revenue Share (\$)	Female Revenue Share (\$)	Total State Revenue (\$)
Texas (TX)	\$6,000,000	\$7,000,000	\$13,000,000
New York (NY)	\$6,000,000	\$7,000,000	\$13,000,000
California (CA)	\$7,000,000	\$6,000,000	\$13,000,000
Florida (FL)	\$4,000,000	\$6,000,000	\$10,000,000
New Jersey (NJ)	\$2,000,000	\$3,000,000	\$5,000,000

| Customer Satisfaction & Portfolio Targets

Key Operational Metrics

The dashboard track records a Customer Satisfaction Score (CSS) of **3.19**. To improve this indicator, the following formula models target expectations:

$$CSS = \frac{\sum \text{Revenue}_{\text{Top Jobs}}}{\sum \text{Income}_{\text{All Segments}}} \times 100$$

🎯 Tactical Growth Action Items

- 📈 **Upsell Core Blue Base:** Since Blue cards dominate (\$46M), target top 15% for Silver and Gold tier promotions.
- 📱 **Promote Digital Wallet Usage:** Online channel generates just \$3M revenue; incentivize mobile transactions over traditional POS swipes.
- 📦 **Regional Marketing campaigns:** Focus promotional spend in Texas, NY, and California.

Questions & Discussion

Thank you for reviewing the dashboard analysis. Open to any specific questions about the data structures or visualization modeling.
